OUR VISION

Is to be recognised as the market leader in the industry, renowned for our commitment to uncompromising quality and world-class service.

OUR MISSION

Is to build sound customer relationships in order to establish our client's needs and to maintain and uphold service standards. We recognise and value the contribution our employees make towards achieving our Vision, and aim to motivate and empower our staff to work as a team in a meaningful and rewarding environment.

WE LEAD, OTHERS FOLLOW™

Established in 1980, Longspan Gutters has grown into a group of well-established companies with offices, manufacturing and warehouse facilities in Cape Town, Durban and Johannesburg. We're geared to offer our products and services with mobile factory units throughout the provinces of the Western Cape, KwaZulu-Natal and Gauteng.

Setting the industry standard since 1980, our dedicated management team and skilled personnel continually strive for business excellence ensuring our customers receive the best products and services at the best possible price.

Longspan Gutters is committed to providing excellent customer service, quality installations, top-

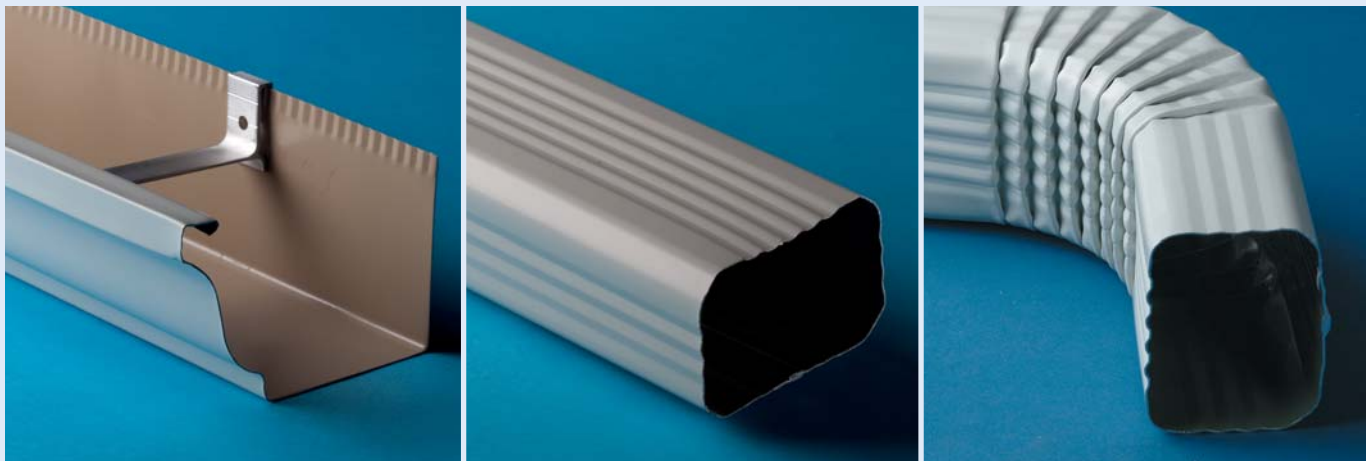

class workmanship, high quality machine manufactured products and a nationwide distribution service that is unparalleled.

Longspan Gutters is a full-service gutter business. We're able to offer our customers in the residential, commercial and industrial markets a comprehensive solution to most configurations by providing standard roll-formed seamless gutters on site, purpose-made gutters, fascia and barge board replacements, purpose-made cladding and flashing, and rainwater harvesting solutions.

We're confident that our knowledge and experience in our industry will allow us to remain the market leaders in South Africa.

Longspan Gutters - Cape Town, Durban and Johannesburg.

Longspan Gutters - Manufacturers, distributors and installers of quality seamless aluminium guttering since 1980.

Forming - Our gutters are roll-formed on site to precise lengths through our gutter machines housed in our mobile factory units. The process is fast, efficient and hassle-free. Our seamless aluminium gutters are guaranteed not to fade, leak or rust.

Standard colour range

Please note colours may differ slightly. Please contact Longspan Gutters for colour swatches.

*Non-standard colour range

Available on request, subject to terms and conditions.

Coating

The aluminium coating formulation has been selected to provide optimum qualities of film hardness, flexibility for forming operations, light fastness and resistance to weathering and chalking.

Guarantee

The company warrants for a period of 12 (twelve) months from the completion date, that the goods and services will be free from defects in workmanship under normal use.

The customer is given a 15 (fifteen) year guarantee against corrosion, rusting, flaking or peeling, in respect of aluminium goods provided by the company.*

Downpipes

These can be aluminium or PVC.

Sizes: **Aluminium:** 75x50mm
100x75mm
76mm diameter
101mm diameter

PVC: 75x65mm
80mm diameter
110mm diameter
160mm diameter

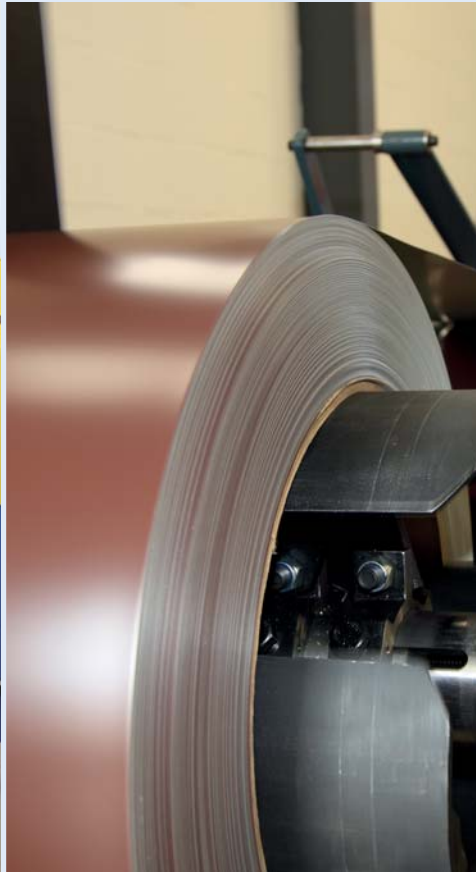

Longspan Gutters is an environmentally responsible company

We incorporate the use of environmentally friendly, recyclable aluminium products in the manufacture, distribution and installation of our water-efficient rainwater products. Any waste material generated from sites which we've worked on is carefully removed and disposed of through environmentally responsible practices.

*Our 15 Year Guarantee Certificate is available for inspection.

Manufacturing - Our skilled team of full-time operators manufacture world-class aluminium rainwater products using state-of-the-art machinery from our factories in Cape Town, Durban and Johannesburg.

Gutter Installation

The installation process is undertaken by our highly skilled workforce. All of Longspan Gutters personnel are employed by the company and as a result no work is undertaken by outside contractors. This makes for speedy, efficient and stress-free installations for our customers peace-of-mind.

The lightweight gutter can be fixed to anything - fascia boards, rafter ends, walls or hung from the roof itself. All gutter brackets are made from tempered aluminium. The brackets are a concealed fix system, thus enhancing the overall aesthetic of the pleasing gutter profile.

The gutter is seamless - no joins, no leaks, no rust, no unsightly external brackets and is maintenance-free.

Our staff continue to strive for excellence in the workplace by attending formal learnership workshops and receive on-going training and support from our dedicated management team.

On-site safety for our staff is of paramount importance to us. They're fully trained and regularly updated on quality and safety management. This ensures complete customer peace-of-mind.
